Professional Summary

Full Stack Software Engineer experienced in designing and developing scalable web applications using MERN/MEAN stack. Strong in Data Structures, REST APIs, and modular frontend architecture, with a focus on performance, reliability, and clean system design.

Skills

Programming Languages: C++, Python, JavaScript, TypeScript

Frontend: React.js, Next.js, Angular, HTML, CSS

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control

Databases: MongoDB (CRUD, schema design) | **Tools:** Git/GitHub, Agile, CI/CD

Data Structures & Algorithms: Arrays, HashMaps, Stacks, Queues, Linked Lists, Trees, Graphs, Sorting, Searching, BFS, DFS, Dijkstra's Algorithm

Work Experience

Accenture, Hyderabad — Full Stack Developer (Nov 2023 – Present)

- Led end-to-end development of a full-stack e-commerce platform using MERN/MEAN stack, supporting user authentication, product catalog, and order lifecycle management.
- Designed and implemented secure JWT-based authentication and Role-Based Access Control (RBAC), ensuring controlled multi-role access across user and admin systems.
- Built scalable RESTful APIs using Node.js and Express, optimizing database queries and reducing response latency through indexing and efficient schema design in MongoDB.
- Developed modular and reusable frontend components in React/Angular, improving maintainability and reducing feature development time across modules.
- Engineered dynamic admin dashboards for real-time product, user, and order management with robust validation and error handling.
- Conducted root cause analysis and resolved production defects, enhancing system reliability and user experience.

Technologies: JavaScript, TypeScript, Node.js, Express.js, React.js, Angular, MongoDB, REST APIs, JWT, Git, Agile

Projects

Smart Route Optimizer (DSA & Backend Project)

Technologies: C++, Data Structures & Algorithms

Wildfire Detection Using Image Processing (Final Year Project)

Technologies: Python, OpenCV, Keras, CNN, HTML, CSS, JavaScript

AI-Powered Incident Triage & Root Cause Analysis System (Personal Project)

Technologies: Next.js, TypeScript, REST API, Prisma, SQLite, OpenAI (AI)

Education

VIIT Vishakhapatnam — B.E. in Computer Science and Engineering (Aug 2019 – Apr 2023)

CGPA: 8.36 / 10 | *Relevant Coursework: C, C++, Python, OOP, Databases, DSA, OS, Computer Networks, Machine Learning, Data Mining*

Professional Development & Certifications

Corporate Training (Accenture): Generative AI, Agentic AI, DevOps, Git/GitHub, Agile, SDLC, Software Engineering
